CASE MANAGEMENT: A Kaleidoscope of Care

Welcome!

Case managers are met daily with problems and challenges which often cause our view and our patients' view of our role and the healthcare system to be refracted.

We invite you to join us on our journey to see how we can utilize each other and learn about new systems in order to create a new view for ourselves and our clients.

No matter how you look at Case Management, each case manager makes a meaningful connection for clients to necessary services. These connections create a meaningful pattern of care as we seek to be advocates for our patients and to create empowerment.

Join us to learn how we can better connect with one another. Come to embrace new knowledge to assist the creation of your own patterns of care and sharpen your view of the health care system through the lens of the case management kaleidoscope.

2009 Conference Committee and Board of Directors.
